SECURITY LEAGUE SCHOOL SYSTEM

Its Great Campaign of "Patriotism Through Education" Being Pushed in All States With Signal Success.

DR. Wm. F. MARTIN

The great campaign of "Patriotism Through Education," inaugurated several months ago by the National Security League to arouse the people of the country to a realization of the true meanings of the war and at the same time lay the foundations for a permanent system of patriotic educa-tion in the public schools, has now been extended into nearly every state in the Union. The League is rapidly completing arrangements, through the various organized educational agencies of the country, by means of which its message of militant patriotism will be carried into every nook and corner

This effort of the National Security League, which has the indersement of all the leading American educational authorities and has enlisted the active co-operation of educators of prominence in every part of the country, is being promoted under the direction of a notable committee, headed by Dr. Robert M. McElroy of the Department of History and Politics in Princeton University, who is serving as Educa-tional Director of the National Security League under leave of absence. Mrs. Thomas J. Preston, Jr. (formerly Mrs. Grover Cleveland), is Secretary of the committee.

The Security League's objective is, in addition to giving exact information on the meanings of the war and its causes, to create a more responsive American citizenship through the medium of better methods of permanent patriotic instruction in the public

Twenty-eight Tone of Literature.

In order to reach the greatest number of public school tenchers direct, the League conducted classes in patriotic education and distributed its literature giving practical suggestions on patriotic instruction at 254 of the principal Summer Schools for Teachers throughout the country during the past few weeks. The literature dis-tributed by the League as the result of the work at these schools has reached a bulk of 28 tons. The League estimates that it obtained immediate contact with approximately 200,000 public school teachers, who will carry the message home to classes totalling over 2.500,000 pupils.

The Security Lengue is now preparing to follow up these results with a definite plan of organized promotion among the Teachers' Institutes held in the various states every fall and unlfled direction of the sprending of the propaganda in the separate states. The methods followed in the different states vary according to local conditions and facilities. In some states the direct co-operation of the State Departments of Education has already been obtained by the Security League, In other states the propaganda is handled through the County Superintendents, State Universities and by sending workers into the state from the headquarters of the League.

Some of the more prominent educaengaged in the promotion of the Security League's idea are: Dr. C. A. Richmend, President of

Union College; Albert Shiels, Superintendent of Schools of Los Angales; Dr. M. F. Libby, of the University of Colorado; Dr. Liberty Hyde Balley, arboricultural and horticultural expert and author.

Examples of Operation.

An example of the operation of the plan under state supervision is given in Minnesota, where State Superintendent of Education Schulz prepared the linerary to be followed by Dr. William A. Frayer, of the University of Michigan, in charge of the work in that state for the Security League. In Colorado Dr. Libby found It more effective and convenient to work directly with the County Superintendents. but this with the heartlest approval of the State Superintendent and the

An important division of the campalgn is being devoted to negro tenchers and schools. Among the men who have been consucting the missioners work in this field for the Security League are: Dr. Holland Thompson, of the Cuitege of the City of New York; Dr. L. B. Moore, Dean of Heward University; Dr. Isaac, I. Lansing, of Pidgewood, N. J.; Dr. M. S. Davage, President of Samuel Houston College. They have delivered patriotic addresses and conducted actual classes for teachers in the Negro Summer Schools of Virginia, North Carolina, Alabama, Mississippi, Lou-Islana and Texas. Dean Moore, him self a negro, has obtained the organt zation of more than 400 patriotic education classes among negro adults to Louisiana and Mississippi.

Laboratory Experiments.

The Security League also has in op-eration at Lawrence, Mass., in co-operation with the local educational authorities, an Experimental School, at which methods of patriotic instruction are being worked out on the laboratory plan. The League is about to establish a similar school under the auspices of the State Department of Education of California at Los An

The Branch House Man

This is one of the Swift & Company Branch House Men.

They are all pretty much alike in the way they feel toward their work-and that is what this ad is about.

They know that most people couldn't

get such good meat promptly and in good condition if it weren't for the branch houses of which they are in charge. They know that the branch house is

one of the most important links in the chain of preparing and distributing meat for a

They know that Swift & Company must have its branch houses run at the highest notch of usefulness; that even a Swift & Company branch house won't run itself, and that it is up to the branch house man to run it properly.

Any branch house man who doesn't see his work in this light is transferred to some other place with Swift & Company to which he is better adapted.

They are picked men, these branch house men. Every time you sit down to a steak or chop, or cut of reast, you can give a grateful thought to the whole crew of them.

And remember, in a general way, that everything that makes life smoother and more convenient for you, is the result of the thoughtfulness and effort of a lot of people of whom you have never heard.
